

Dear members,

We are interested in measuring the economical contribution of hospitals to the economy and we would like to know if studies have been done in your respective countries in the past 5 years on this topic.

We would be grateful if you could share such study to us (any language).

If in your team, you have a focal point that has worked on this matter, is it possible for you to provide his/her contact detail?

Thank you for giving us a response by the 18th of October at benoit.vieules@ihf-fih.org

Kind regards,

The IHF Secretariat
